

## DPTN/DPTD Differential Pressure Transmitter

### Applications & Features

- Apply high accuracy MEMS sensor and digital technologies, can measure positive, negative or differential pressure. DPTN is suitable for surface mount.
- It can measure system pressure of fan, blower, filter, furnace draft and orifice plate and can apply to various clean room, biological safety cabinet, clean bench, ducts collection, medical or pharmaceutical machine, etc.
- Multiple ranges, engineering units and outputs
- Good performance with accuracy of 1.0% and range as low as 25Pa
- Function keys: zero calibrate, unit select, response time set, etc.
- Field upgradable LCD display module and multiple ranges selectable. The LCD of DPTN can have 180° reverse installation, meets different installation requirements and wiring methods
