

ADVANTAGE

Exquisite Protective Cap

Made of aluminum, good ductility, good corrosion resistance, light weight and good electrical conductivity.

Thickened high quality paper tube

The paper tube has high hardness, and the measurement of molten steel and molten iron paper tube also has high flame retardancy. The length of the paper tube can be customized according to customer requirements.

Plugin

Fast thermocouple plug-in housing brass, plug copper, high-quality insulation material, wear-resistant high temperature resistance, side formation rate Daewoo equals 98%, response time is less than or equal to 5S.

Thickened pipe wall

The pipe wall is made of thick high-quality paper tube, which is thicker than the paper tube wall produced in general.
